## AUTOMATION SYSTEMS

### GEMINI 7Ah DC SLIDER

|                        |                                            |
|------------------------|--------------------------------------------|
| APPLICATION            | Residential                                |
| MAXIMUM GATE WEIGHT    | 500Kg                                      |
| MOTOR                  | 12 Volt DC                                 |
| MOTOR SIZE             | 120 Watt                                   |
| GEARBOX                | Oil filled worm drive                      |
| GEARBOX RATIO          | 33:1                                       |
| PULL FORCE - STARTING  | 30 Kgf                                     |
| PULL FORCE - RATED     | 17 Kgf                                     |
| OPENINGS**             | 150 per Day                                |
| GATE SPEED             | 19 meter/min                               |
| OBSTRUCTION SENSING    | Electronic Adjustable                      |
| ACTIVATION             | N/O Electrical circuit                     |
| OTHER FEATURES         | Gemlink Smart Compatible                   |
|                        | Solar Compatible                           |
|                        | Auto close adjustable time (2-60sec)       |
|                        | LED Display mode                           |
|                        | Optional buzzer during operation available |
|                        | IRB sensing connection                     |
|                        | Pedestrian facility                        |
|                        | Mechanical override                        |
|                        | Battery operated                           |
|                        | Soft start and stop                        |
| BATTERY                | 12 Volt - 7.2 AH                           |
|                        | 220-260 Volt / 150 mA                      |
| ELECTRICAL CONSUMPTION |                                            |
|                        |                                            |
| DUTY CYCLE             | 75%                                        |

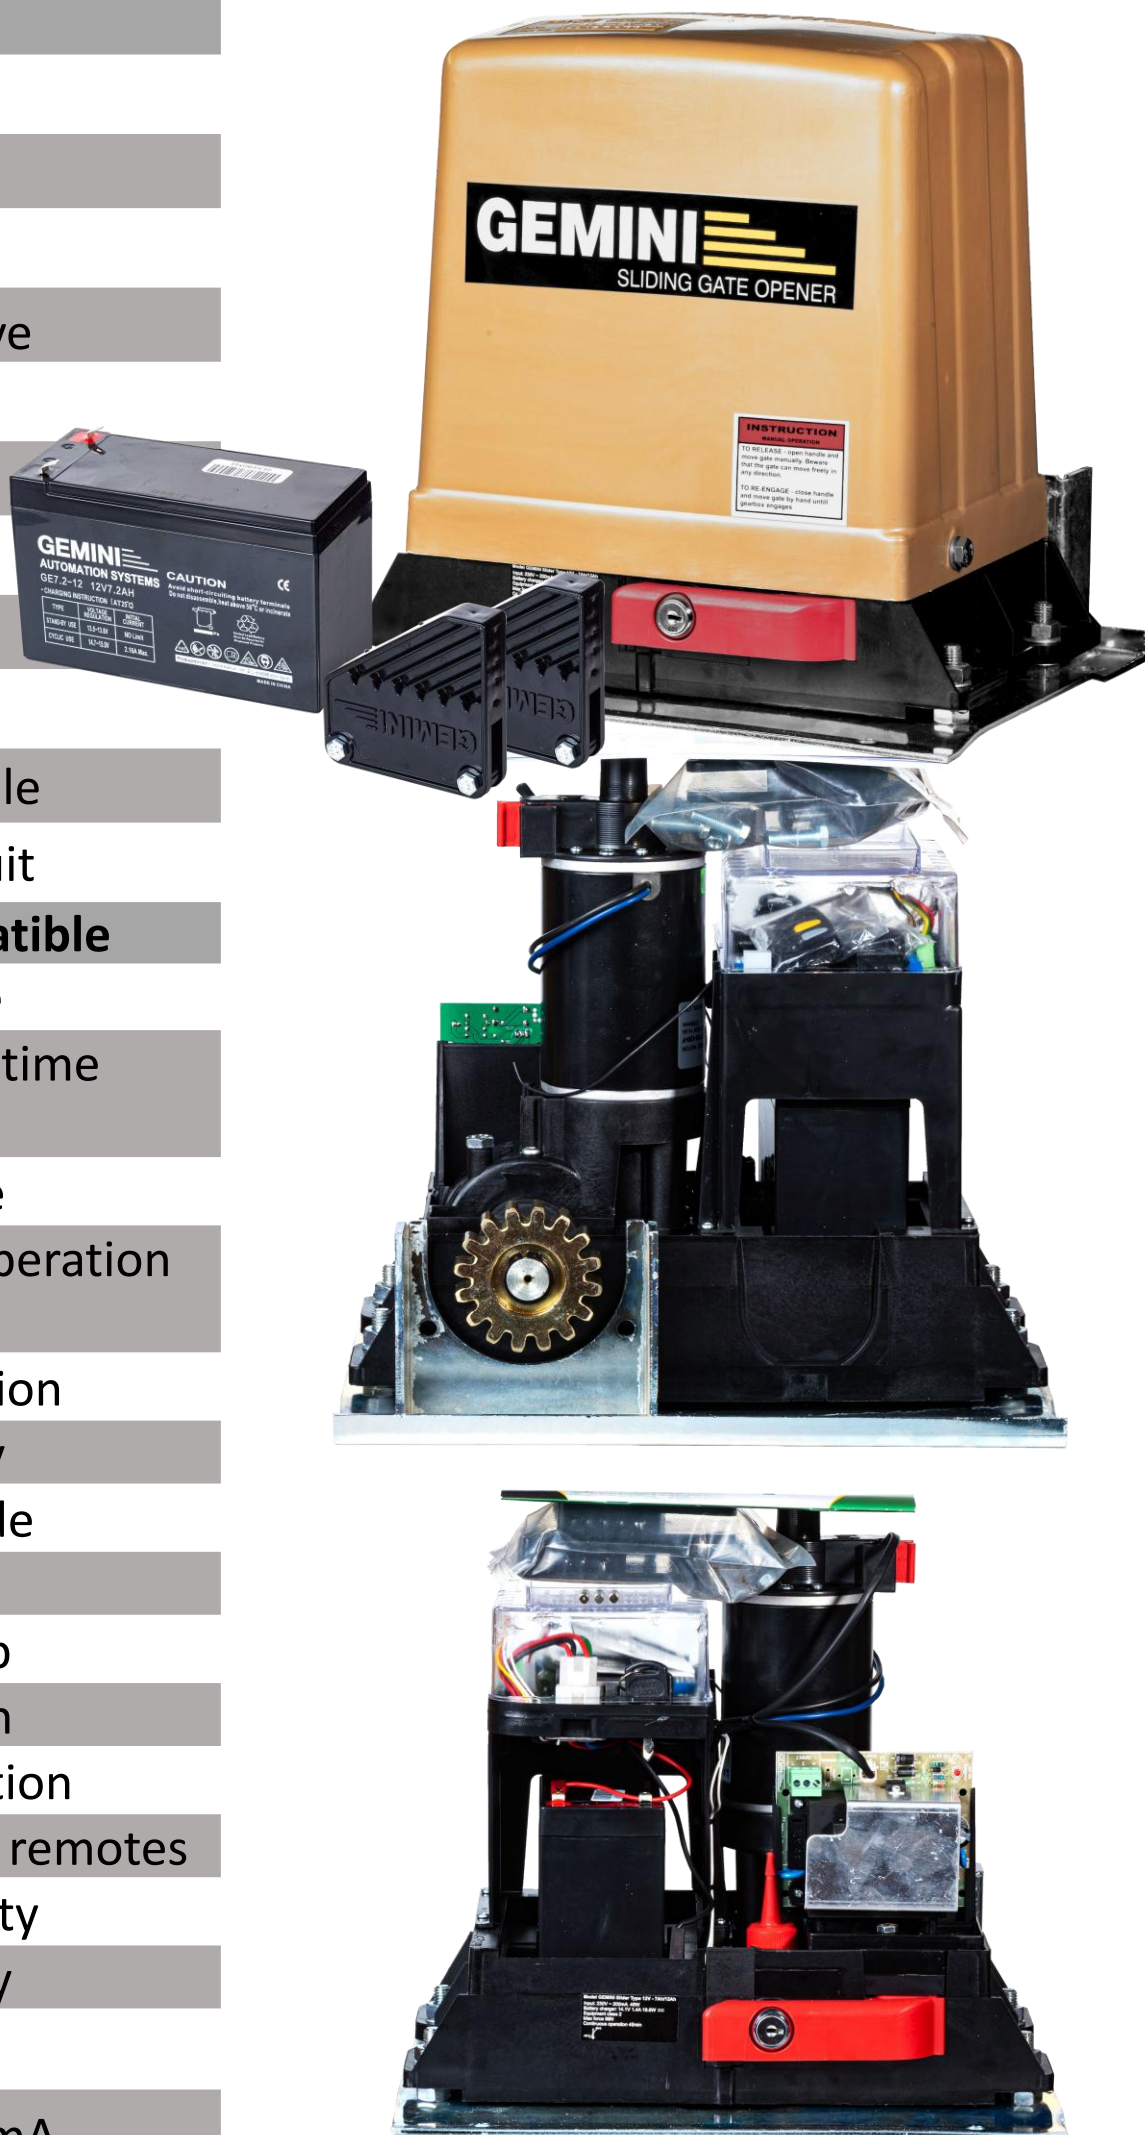

### GUARANTEE

|                         |           |
|-------------------------|-----------|
| MECHANICAL              | 24 Months |
| ELECTRICAL & ELECTRONIC | 12 Months |

### PACKING DIMENSIONS (mm)

|                  |                        |
|------------------|------------------------|
| MOTOR BOXED (mm) | 360 x 285 x 400 = 14Kg |
|------------------|------------------------|

\*\* Amount of openings per day is based on a push force of less than 50% of rated and starting force and may vary depending on gate and battery conditions \*\*All specifications are subject to change without notice
